## 1.2.2: Add on course list during the last five years

Year	Year	Name of course
2023	MBBS 1 <sup>st</sup> year	Yoga
		Hygiene & cleanliness
	MBBS 2 <sup>nd</sup> year	Hospital Acquired infections
	MBBS 3 <sup>rd</sup> year part 1	Disaster management
		Research methodology
	MBBS 3 <sup>rd</sup> year part 2	Basic life support skills
		ECG learning

Year	Year	Name of course
2022	MBBS 1 <sup>st</sup> year	Yoga & meditation
		Personal Hygiene
	MBBS 2 <sup>nd</sup> year	Nosocomial infections
	MBBS 3 <sup>rd</sup> year part 1	Disaster impact
		Research tools
	MBBS 3 <sup>rd</sup> year part 2	Knowing life support skills
		Basics of ECG

Year	Year	Name of course
2021	MBBS 1 <sup>st</sup> year	Yoga
		Hygiene & cleanliness
	MBBS 2 <sup>nd</sup> year	Hospital Acquired infections
	MBBS 3 <sup>rd</sup> year part 1	Disaster management
		Research methodology
	MBBS 3 <sup>rd</sup> year part 2	Basic life support skills
		ECG learning

Year	Year	Name of course
2019	MBBS 1 <sup>st</sup> year	Yoga
		Hygiene & cleanliness
	MBBS 2 <sup>nd</sup> year	Hospital Acquired infections
	MBBS 3 <sup>rd</sup> year part 1	Disaster management
		Research methodology
	MBBS 3 <sup>rd</sup> year part 2	Basic life support skills
		ECG learning

## **ADD ON COURSE: YOGA**

### **Preamble:**

Indian tradition of Yoga has gained global recognition and its benefits have been well appreciated and accepted worldwide. It began as a spiritual practice but has become popular as a way of promoting physical and mental health. Practicing yoga regularly helps in building self control and discipline. In fact, Yoga is not only about asanas but it is a way of life. This value added course designed by Department of Physiology, PIMS will definitely benefit the student in a long way.

### **Objectives:**

On completion of Yoga course, students should be able to:

1. Know and perform physical postures that strengthen muscles,
2. Describe asanas, pranayam, and deep breathing exercises
3. To develop healthy habits for better quality of life

**Duration:** 16 Hours

**Intake:** 30

**Medium of Instruction:** English

### **Syllabus / Course Content:**

Theory lectures on yoga will be conducted by Department of Physiology & practical demonstration will be done by expert Yoga teachers who are invited to conduct the course. The content of the course include theory as well

**RK**  
**DEAN**

# Hygiene & Cleanliness

**RE  
DEAN**  
Prakash Institute of Medical  
Sciences & Research  
URUN-ISLAMPUR. (Sangli)

## PRACTICING PERSONAL HYGIENE AND CLEANLINESS

### **Preamble:**

Cleanliness is most important for physical well being and a healthy environment. It has bearing on public and personal hygiene. Good personal hygiene is important for both health and social reasons. It entails keeping hands, head and body clean and healthy and impacts the lives of those around us too. It is essential for even student to learn about the cleanliness awareness programs.

### **Objectives:**

- 1) To enable the students to maintain their personal hygiene.
- 2) To make the students aware about the cleanliness awareness programs.
- 3) To involve students in cleanliness and tree plantation activities.

**Duration :** 16 Hours

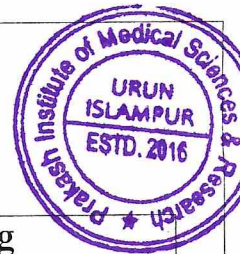

**Intake :** 30

**Eligibility :** UG/PG students of any discipline

**Medium of Instruction:** English

# Hospital Acquired Infections

**RK**  
**DEAN**  
Prakash Institute of Medical  
Sciences & Research  
URUN-ISLAMPUR. (Sangli)

## HOSPITAL ACQUIRED INFECTIONS

### Objectives:

On completion of Hospital acquired infection course, students should be able to:

1. Know what is Hospital acquired infection and different organisms causing Hospital acquired infection,
2. Describe modes of transmission of Hospital acquired infection
3. Describe different treatment, preventive and curative measures to avoid Hospital acquired infection

**Duration:** 16 Hours

**Intake:** 30

**Eligibility:** all UG students

**Medium of Instruction:** English

Name of topic	Teaching learning method	Hours
Introduction of Hospital acquired infection	Lecture	1 hours
Transmission and details about Hospital acquired infection	Lecture	2 hours
Visit to microbiology department	Practical	3 hours
Visit to hospital/different wards, opd	Practical	3 hours
Treatment modalities	Lecture	3 hours
Preventive and curative options	Lecture	3 hours
ASSESSMENT	Theory: MCQs	1 hour

1. Definition • infections that develop within a hospital or are produced by microorganisms, acquired during hospitalization, within 48hrs. • also called as “nosocomial infections.” • ‘nosus’ means disease. • ‘kameion’ means to take care of.
2. definition by c.d.c infections that the patients acquire during the course of receiving treatment for other conditions, or acquired by the healthcare workers while performing their duties in healthcare settings.
3. Host factors the agent epidemiological interaction environment
4. sources of infection 2 sources : a)exogenous -outside the human body b) endogenous - by normal human flora
5. A) caused by organisms acquired by exposure to hospital personnel, medical devices or hospital environment. Exogenous infections b) caused by organisms that are present as a part of normal flora of the patient. Endogenous infections.
6. surgical site infections • any purulent discharge, abscess, or spreading cellulitis at the surgical site during the month after the operation. • the infection is usually acquired during the operation itself; either exogenously (e.g. From the air, medical equipment, surgeons and other staff), endogenously from the flora on the skin or in the operative site or, rarely, from blood used in surgery
7. Urinary tract infections : positive urine culture (1 or 2 species) with at least 10<sup>5</sup> bacteria/ml, with or without clinical symptoms. Most common nosocomial infection. 80% of infections are associated with the use of an indwelling bladder catheter
8. Respiratory infection : respiratory symptoms with at least two of the following signs appearing during hospitalization: cough ,purulent sputum , new infiltrate on chest radiograph consistent with infection.

9. blood stream infections : represent a small proportion of nosocomial infections. Case fatality : >50%, organisms involved : multi resistant coagulase - negative staphylococcus and candida spp.
10. Modes of transmission routes of spread contact air borne exogenous
11. Contact transmission (most common mode of transmission) contact direct indirect hands, autoinoculation, equipment. Bedpans, dressings, contaminated gloves
12. Air borne transmission : droplet nuclei in the atmosphere , respiratory secretions on surface (fomites).
13. Exogenous infections sites in hospital-infections

RE  
DEAN  
Prakash Institute of Medical  
Sciences & Research  
URUN-ISLAMPUR. (Sangli)

14. Preventing nosocomial infections
15. Isolation • infectious patients must be isolated. • patients susceptible to infection should not be placed in the beds next to patients who are a source of infection.
16. . Measures by hospital staff • those suffering from infectious ailments should be kept away from work until completely cured. • they should be careful about personal hygiene. • aprons & outer clothing should be regularly changed.
17. Hand washing
18. . Hand hygiene hands are the most important vehicles of hai transmission • most important measure to avoid the transmission of harmful microorganisms.
19. Dust control • dust is released during sweeping, dusting & bedmaking. • Suppression by wet dusting vacuum cleaning
20. Proper disposal of hospital waste color waste treatment yellow human & animal anatomical waste/microbiology waste and soiled cotton/dressings/linen/bedding etc. Incineration/ deep burial red tubing/catheters/i.v. Sets etc. Autoclave/micro wave/chemical treatment blue/white waste sharps (needles, syringes, scalpels, blades etc.) Autoclave/micro wave/chemical treatment/ destruction black discarded medicines/ cytotoxic drugs/incineration ash/chemical waste disposal in land fields
21. disinfection • disinfection prevents transmission of organisms between patients. • levels of disinfection: a) high level - destroys all the microorganisms except heavy contamination by bacterial spores.b) intermediate level – inactivates m.tuberculosis, vegetative bacteria, most viruses & fungi. C) low level – kills most bacteria, some viruses & some fungi.

- 
22. Sterilisation • operationally, defined as decrease in microbial load to  
done for - medical devices penetrating sterile body sites, parenteral  
medications, reprocessed equipment • the objects must be wrapped after  
sterilization to maintain its viability for longer durations of time.
23. control of droplet infection -use of face-mask, proper bed-spacing,  
prevention of overcrowding, ensure adequate ventilation
24. Improving nursing techniques -barrier nursing is the effective measure. Its  
aim is to protect medical staff against infection by patients, especially with  
highly infectious diseases.
25. Administrative measures • a) formation of a hospital “control of infection  
committee” to formulate the policies regarding admission of infectious cases,  
isolation facilities & disinfection procedures. • b) formation of a cssd (central  
sterile supply department) in every hospital.

RK  
DEAN  
Prakash Institute of Medical  
Sciences & Research  
URUN-ISLAMPUR. (Sangli)

## 26. Standards To Be Maintained In Hospital

### 27. C.S.S.D

- Supply of sterile instrument & material for dressing & procedure carried out in the wards and departments.
- Sterilization of instruments & linen for use in O.T.
- Disinfection & Sterilization of medical equipment.
- Selection & distribution of single use sterile supplies such as catheters, suction tubes, syringes.

## Disaster Management

**1. Aim:** This course aims to raise the level of awareness and preparedness as well as to enhance analytical skills and professional competencies of different key stakeholders in various areas of Disaster Risk Management.

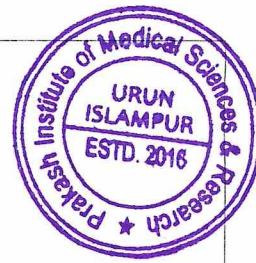

### **Objectives-**

- To professionalize disaster risk reduction and emergency management in India by developing an independent cadre of professionally trained emergency and mitigation managers.
- To promote formal training and education for disaster management in India and in the region

- **Duration of the course:** 16hrs
- **Eligibility Criteria:** all UG students
- **Method of assessment** –multiple choice questions attendance

### **2. Course contents:**

1. Understanding Disasters and Disaster Management	Lecture	1hr
2. Disaster Health care management, Disaster Trends, Geological Disasters	Lecture	1hr
3. Visit to district disaster management office	Practical	3hr
4. Hydro-Meteorological Disaster, Village Disaster Management Plan	Lecture	2hr
5. Dos' and Don'ts For Various Hazards/Disasters	Lecture	2hr
6. Differential Impact of Disasters on Women and Men	Lecture	2hr
7. Engendering Disaster Management	Lecture	2hr
8. Empowering Women and Men in Disaster Risk Management	Lecture	2hr
9. Assessment	MCQ/viva	1hr

- **List reference books**

1. Disaster Management by G.K. Ghosh
2. Emergency Medical Services And Disaster Management: A Holistic Approach by P.K. Dave
3. Disaster Management -Recent Approaches by Arvind Kumar
4. Textbook of Preventive and Social Medicine by Mahajan & Gupta
5. Textbook of Community Medicine by Dr Sunder Lal, Dr Adarsh and Dr Pankaj
6. K.Park, Park's Textbook of preventive and social medicine.

**Criteria for completion**—the student must have attended at least 80% of the lectures and completed all the assignments

# Research Methodology

RK  
DEAN  
Prakash Institute of Medical  
Sciences & Research  
URUN-ISLAMPUR. (Sangli)

## **Add on course : Research Methodology**

### **Introduction**

The MBBS program is geared to create a primary care provider of first contact. It also visualises the student as a future scholar, specialist, researcher and scientist. Add on courses are learning experiences that will provide the learner with an opportunity to gain immersive experience of a career stream, discipline or research project. The opportunity to “work” in a clinical, laboratory, research, community set up or in a team-based setting at an early stage in the profession is an invaluable experience for learners as this will have lasting impact on their professional life.

### **Research Methodology**

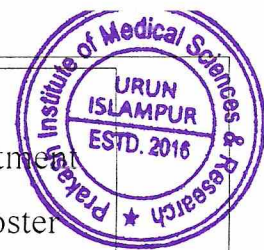

The overall goal of this module is to make students aware of the guiding principles of research concepts in medical field. Through various research activities student will be able to acquire the knowledge, skills and attitudes to enable them to be engaged in scientific research and become self-driven motivated learners. Through participation in research projects, students will enhance their attributes of scientific thinking, team working, leadership, communication and management skills. This in turn will fuel the growth of life-long learning aptitudes.

## ADD ON COURSE IN ECG LEARNING

Prakash Institute of Medical Sciences & Research, Urun-Islampur

### Preamble:

Medical students learn fundamentals of ECG in their First year MBBS in the subject of physiology. The real application of ECG becomes evident in clinical years. Students face a lot of difficulties in interpretation of even normal ECG. In order to revisit the basics of ECG, Department of physiology, in collaboration with department of medicine, has designed a add on course on ECG which will certainly help considerably not only in revisiting basics but also relate the fundamentals to its application.

**Objectives :** At the end of the course the students will be able to

- 1) describe the principles of ECG
2. record ECG independently
3. interpret a normal 12 lead ECG
4. identify common ECG abnormalities

**Course duration:** 16 hours

**Eligibility:** UG students

### Course syllabus:

Module	Topic	Duration
I	Introduction to ECG	1 Hours
II	Recording of 12 lead ECG	3 hours
III	Interpretation of normal ECG & calculation of Heart rate	3 hours
IV	ECG interpretation in common cardiac conditions: MI, cardiac arrhythmias etc	3 hours
V	Electrolyte Imbalance – Hypo/Hypercalcaemia, Hypo – Hyperkalaemia etc & its interpretation in ECG	3 hours

VI	ECG in Heart Blocks	2 hours
Assessment	MCQ/Viva	1 hour

### **Pedagogy**

(i) Lectures

(ii) Practical sessions/demonstrations.

Theory lectures & practical demonstration on ECG will be jointly conducted by Department of Physiology & medicine. Both pretest and post test questionnaire will be given to students to find out how effective the course has been and to bring about desirable modifications if needed.

The students' feedback will be taken to find the effectiveness of the programme. The students will be awarded with the course completion certificates after their satisfactory outcome in assessment.

### **Assessment**

Assessment will be in the form of MCQs.

### **References:**

1. Hampton R John. The ECG Made Easy : The classic introductory text to ECG interpretation.
2. Hampton R John . The ECG In Practice : A great basic ECG text covering all the essentials.
3. Hampton R John . 150 ECG Problems: Test your knowledge with 150 assorted ECGs of varying difficulty.
4. Understanding of ECG – Dr. P.J. Mehta
5. Guyton text book of Physiology
6. ECG for beginners by Subramanian Anandraja.

# Basic Life Support (BLS)

RE  
DEAN  
Prakash Institute of Medical  
Sciences & Research  
URUN-ISLAMPUR. (Sangli)

## **BASIC LIFE SUPPORT**

Cardiopulmonary arrest is defined as the cessation of cardiac activity and confirmed by absence of circulation signals. It is considered a major public health problem specially when it occurs in an out of hospital environment.

The most important determinant for survival in these situations is the performance of Cardiopulmonary resuscitation manoeuvres at the earliest by trained personnel in

B.L.S. One of the greatest challenges is organizing and accessibility of teaching CPR.

The faculty of the Department of Anaesthesiology are trained BLS&ACLS instructors and provide this value added course of BLS.

The main Aim of the course is to impart knowledge and skills among the participants to provide immediate medical care in cardio respiratory arrest conditions until proper medical care at a hospital can be given.

### **Objectives:**

- 1) Identification of Cardio-respiratory arrest.
- 2) Understanding the concepts of Basic life support
- 3) Hands on skills development of BLS on mannequin

**Eligibility:** UG students

**Duration of course:** 16hr

**Course content includes:**

- Early recognition of Cardio Respiratory Arrest
- Activation of Emergency Medical Services
- Early high-quality CPR
- Early defibrillation
- Early transfer.

**Steps of CPR:**

1. Safe place for resuscitation
2. Victim's response check
3. Call for help, inform emergency medical system and get emergency equipment
4. Check pulse and breath simultaneously
5. Early high- quality cardiopulmonary resuscitation:
6. Early defibrillation
7. Recovery position
8. Transfer

### Method of conduction of the course-

- Didactic lectures-2hours.
- Hands on workshop  
Demonstration and  
Assessment- 10 hours Online  
Module teaching and  
assessment-4hours

- **Scheme of examination:**

Multiple choice questions to evaluate the knowledge

.Assessment of the skills of BLS

**Yoga**

**&**

**Meditation**

## **ADD ON COURSE: YOGA & MEDITATION**

### **Preamble:**

Indian tradition of Yoga has gained global recognition and its benefits have been well appreciated and accepted worldwide. It began as a spiritual practice but has become popular as a way of promoting physical and mental health. Practicing yoga regularly helps in building self control and discipline. Infact, Yoga is not only about asanas but it is a way of life. This value added course designed by Department of Physiology, PIMS will definitely benefit the student in a long way.

### **Objectives:**

On completion of Yoga course, students should be able to:

1. Know and perform physical postures that strengthen muscles,
2. Describe asanas, pranayam, and deep breathing exercises
3. To develop healthy habits for better quality of life

**Duration:** 16 Hours

**Intake:** 30

**Course Coordinator:** Dr. Vrushali Nalawade, professor, Department of physiology

**Medium of Instruction:** English

### Syllabus / Course Content:

Theory lectures on yoga will be conducted by Department of Physiology & practical demonstration will be done by expert Yoga teachers who are invited to conduct the course. The content of the course include theory as well

As practical demonstrations and practice of different types of pranayama and Yogasans.

Name of topic	Teaching learning method	Hours
Introduction & history of Yoga,Ashtangyoga.	Lecture	1 hours
Pranayam& deep breathing exercises:Anulom Vilom, Bhramari, Kapalbhata and Bhasrika,OmkarSadhana	Lecture, Demonstration	2 hours
Suryanamaskar	Lecture, Demonstration	2 hours
Basic Sitting Postures and their effects on health and wellbeing. Paschimottanasana, Shirashasana, Naukasana, Vakrasana, Padmasana, Vajrasanaetc	Lecture, Demonstration	3 hours
Basic Standing Postures	Lecture, Demonstration	3 hours

and their effects on health and wellbeing, Tadasana, Garudasana, Trikonasana etc		
Basic Supine Postures and their effects on health and wellbeing. Makarasana, Dhanurasana, Bhujangasana, Halasana, Sarvangasana, Shalabhasana, Naukasana, Shavasana etc.	Lecture, Demonstration	4 hours
ASSESSMENT	Theory: MCQs Practical: Demonstration of asana	1 hour

# Personal Hygiene

## **PRACTICING PERSONAL HYGIENE**

### **Preamble:**

Cleanliness is most important for physical well being and a healthy environment. It has bearing on public and personal hygiene. Good personal hygiene is important for both health and social reasons. It entails keeping hands, head and body clean and healthy and impacts the lives of those around us too. It is essential for even student to learn about the cleanliness awareness programs.

### **Objectives:**

- 1) To enable the students to maintain their personal hygiene.
- 2) To make the students aware about the cleanliness awareness programs.
- 3) To involve students in cleanliness and tree plantation activities.

**Duration : 16 Hours**

**Intake : 30**

**Eligibility : UG/PG students of any discipline**

**Medium of Instruction: English**

### Syllabus / Course Content :

Name Of The Topic (Theory / Practical Demonstration)	Teaching Hours
<b>Theory</b>	<b>16 Hours</b>
<b>Personal hygiene-</b> Importance of personal hygiene, ways of maintaining good personal hygiene	3 Hours
<b>Cleanliness Awareness program :</b> (i) Swachh Bharat Abhiyan (Clean India Mission) (ii) Clean Campus Mission (iii) Role of youth in Clean India Mission	2 Hours
Practical: Cleaning activities inside and surroundings of Department buildings.	2 Hours
Tree plantation activities	2 Hours
Waste Management	1 Hour
Planning and execution of collection of Garbage from different sections of college campus	2 Hours
Role of youth in power saving, pollution control, control of global warming, preservation of ground water and many more issues of national importance.	2 Hours
Cleanest Department/area in college	1 Hour
Assessment Pattern: Mcq/Essay Writing	1 Hour
Competitions

# Nosocomial Infections

# NOSOCOMIAL INFECTIONS

## Objectives:

On completion of Nosocomial infection course, students should be able to:

1. Know what is Nosocomial infection and different organisms causing Nosocomial infection,
2. Describe modes of transmission of Nosocomial infection
3. Describe different treatment, preventive and curative measures to avoid Nosocomial infection

**Duration:** 16 Hours

**Intake:** 30

**Eligibility:** all UG students

**Medium of Instruction:** English

Name of topic	Teaching learning method	Hours
Introduction of Nosocomial infection	Lecture	1 hours
Transmission and details about Nosocomial infection	Lecture	2 hours
Visit to microbiology department	Practical	3 hours
Visit to hospital/different wards, opd	Practical	3 hours
Treatment modalities	Lecture	3 hours
Preventive and curative options	Lecture	3 hours
ASSESSMENT	Theory: MCQs	1 hour

- 
1. Definition • infections that develop within a hospital or are produced by microorganisms, acquired during hospitalization, within 48hrs. • also known as “nosocomial infections.” • ‘nosus’ means disease. • ‘kameion’ means to take care of.
  2. definition by c.d.c infections that the patients acquire during the course of receiving treatment for other conditions, or acquired by the healthcare workers while performing their duties in healthcare settings.
  3. Host factors the agent epidemiological interaction environment
  4. sources of infection 2 sources : a)exogenous -outside the human body b) endogenous - by normal human flora
  5. A) caused by organisms acquired by exposure to hospital personnel, medical devices or hospital environment. Exogenous infections b) caused by organisms that are present as a part of normal flora of the patient. Endogenous infections.
  6. surgical site infections • any purulent discharge, abscess, or spreading cellulitis at the surgical site during the month after the operation. • the infection is usually acquired during the operation itself; either exogenously (e.g. From the air, medical equipment, surgeons and other staff), endogenously from the flora on the skin or in the operative site or, rarely, from blood used in surgery
  7. Urinary tract infections : positive urine culture (1 or 2 species) with at least 10<sup>5</sup> bacteria/ml, with or without clinical symptoms. Most common nosocomial infection. 80% of infections are associated with the use of an indwelling bladder catheter
  8. Respiratory infection : respiratory symptoms with at least two of the following signs appearing during hospitalization: cough ,purulent sputum , new infiltrate on chest radiograph consistent with infection.

9. blood stream infections : represent a small proportion of nosocomial infections. Case fatality : >50%, organisms involved : multi resistant coagulase - negative staphylococcus and candida spp.

10. Modes of transmission routes of spread contact air borne exogenous
11. Contact transmission (most common mode of transmission) contact direct indirect hands, autoinoculation, equipment. Bedpans, dressings, contaminated gloves
12. Air borne transmission : droplet nuclei in the atmosphere , respiratory secretions on surface (fomites).
13. Exogenous infections sites in hospital-infections

14. Preventing nosocomial infections

15. Isolation • infectious patients must be isolated. • patients susceptible to infection should not be placed in the beds next to patients who are a source of infection.

16. . Measures by hospital staff • those suffering from infectious ailments should be kept away from work until completely cured. • they should be careful about personal hygiene. • aprons & outer clothing should be regularly changed.

17. Hand washing

18. . Hand hygiene hands are the most important vehicles of hai transmission • most important measure to avoid the transmission of harmful microorganisms.

19. Dust control • dust is released during sweeping, dusting & bedmaking. • Suppression by wet dusting vacuum cleaning

20. Proper disposal of hospital waste color waste treatment yellow human & animal anatomical waste/microbiology waste and soiled cotton/dressings/linen/bedding etc. Incineration/ deep burial red tubing/catheters/i.v. Sets etc. Autoclave/micro wave/chemical treatment blue/white waste sharps (needles, syringes, scalpels, blades etc.) Autoclave/micro wave/chemical treatment/ destruction black discarded medicines/ cytotoxic drugs/incineration ash/chemical waste disposal in land fields

21. disinfection • disinfection prevents transmission of organisms between patients. • levels of disinfection: a) high level - destroys all the microorganisms except heavy contamination by bacterial spores.b) intermediate level – inactivates m.tuberculosis, vegetative bacteria, most viruses & fungi. C) low level – kills most bacteria, some viruses & some fungi.

- 
22. Sterilisation • operationally, defined as decrease in microbial load to  
done for - medical devices penetrating sterile body sites, parenteral  
medications, reprocessed equipment • the objects must be wrapped after  
sterilization to maintain its viability for longer durations of time.
23. control of droplet infection -use of face-mask, proper bed-spacing,  
prevention of overcrowding, ensure adequate ventilation
24. Improving nursing techniques -barrier nursing is the effective measure. Its  
aim is to protect medical staff against infection by patients, especially with  
highly infectious diseases.
25. Administrative measures • a) formation of a hospital “control of infection  
committee” to formulate the policies regarding admission of infectious cases,  
isolation facilities & disinfection procedures. • b) formation of a cssd (central  
sterile supply department) in every hospital.

26. Standards To Be Maintained In Hospital

27. C.S.S.D

- Supply of sterile instrument & material for dressing & procedure carried out in the wards and departments.
- Sterilization of instruments & linen for use in O.T.
- Disinfection & Sterilization of medical equipment.
- Selection & distribution of single use sterile supplies such as catheters, suction tubes, syringes.

**Research**

**Tools**

## Add on course : Research Tools

### **Introduction**

The MBBS program is geared to create a primary care provider of first contact. It also visualises the student as a future scholar, specialist, researcher and scientist. Add on courses are learning experiences that will provide the learner with an opportunity to gain immersive experience of a career stream, discipline or research project. The opportunity to “work” in a clinical, laboratory, research, community set up or in a team-based setting at an early stage in the profession is an invaluable experience for learners as this will have lasting impact on their professional life.

### **Research Tools**

The overall goal of this module is to make students aware of the guiding principles of research concepts in medical field. Through various research activities student will be able to acquire the knowledge, skills and attitudes to enable them to be engaged in scientific research and become self-driven motivated learners. Through participation in research projects, students will enhance their attributes of scientific thinking, team working, leadership, communication and management skills. This in turn will fuel the growth of life-long learning aptitudes.

<b>Name of Course</b>	Research Tools
<b>Learning objectives of the course</b>	<ol style="list-style-type: none"> <li>1. Knowledge about basic research concepts in medical field.</li> <li>2. Apply ethical principals in conducting scientific research.</li> <li>3. Develop an appropriate research question</li> <li>4. Bioethics in Research.</li> <li>5. Overview of Study Designs.</li> <li>6. Knowledge of the use of statistical software to do basic research calculations</li> <li>7. Formulating research proposal</li> </ol>
<b>Number of students that can be accommodated in this course</b>	30
<b>Number hours</b>	16hr
<b>Prerequisites for the course</b>	UG medical students
<b>Learning resources for students</b>	Sackett DL: Clinical epidemiology Robbins & Cotran Pathological basis of disease
<b>List of activities in which the student will participate</b>	<ol style="list-style-type: none"> <li>1. Visit daily to community medicine department.</li> <li>2. Work under guidance of preceptors in learning of basic research concepts, research proposals as per protocol.</li> <li>3. Work under guidance of statistician to learn a statistical analysis of the data.</li> <li>4. Participate in different ongoing</li> </ol>

	<p>data collections, research presentations in the department</p> <p>5. Create and publish oral/poster presentation in CME/workshop/conference</p>
<b>Assessment</b>	<p>Attendance</p> <p>MCQ</p>

**Time table of activities:**

Sr.No.	Duration	Activity	Mode of Learning
1	1 hr	orientation of course content & the structure of the module	Presentation
2	1 hr	Key aspects and values of research, How to select and search a research topic	Presentation
3	2hr	Components & structure of a research proposal, Ethics of medical research	Presentation & demonstration
4	2hr	Overview of Study Designs, Cross-sectional Study	Presentation
5	1hr	Cohort Study , Case-control study	Presentation
6	2hr	RCT	Presentation
7	2hr	Sample size selection, Different statistical tests	Presentation & demonstration
8	2hr	Knowledge of the use of different statistical software	Presentation & demonstration
9	2hr	How to prepare research proposal	Presentation
10	1hr	Assessment	Attendance, MCQ test

# Disaster & Impact

## Disaster & Impact

**1. Aim:** This course aims to raise the level of awareness and preparedness as well as to enhance analytical skills and professional competencies of different key stakeholders in various areas of Disaster Risk Management.

### Objectives-

- To professionalize disaster risk reduction and emergency management in India by developing an independent cadre of professionally trained emergency and mitigation managers.
  - To promote formal training and education for disaster management in India and in the region
- **Duration of the course:** 16hrs
  - **Eligibility Criteria:** all UG students
  - **Method of assessment** –multiple choice questions attendance

### 2. Course contents:

1. Understanding Disasters and Disaster Management	Lecture	1hr
2. Disaster Health care management, Disaster Trends, Geological Disasters	Lecture	1hr
3. Visit to district disaster management office	Practical	3hr
4. Hydro-Meteorological Disaster. Village Disaster Management Plan	Lecture	2hr
5. Dos' and Don'ts For Various Hazards/Disasters	Lecture	2hr
6. Differential Impact of Disasters on Women and Men	Lecture	2hr
7. Engendering Disaster Management	Lecture	2hr
8. Empowering Women and Men in Disaster Risk Management	Lecture	2hr

9. Assessment	MCQ/viva	1hr
---------------	----------	-----

• **List reference books**

1. Disaster Management by G.K. Ghosh

# Knowing Life Support Skills

## **KNOWING LIFE** **SUPPORT SKILLS**

Cardiopulmonary arrest is defined as the cessation of cardiac activity and confirmed by absence of circulation signals. It is considered a major public health problem specially when it occurs in an out of hospital environment.

The most important determinant for survival in these situations is the performance of Cardiopulmonary resuscitation manoeuvres at the earliest by trained personnel in

B.L.S. One of the greatest challenges is organizing and accessibility of teaching CPR.

The faculty of the Department of Anaesthesiology are trained BLS&ACLS instructors and provide this value added course of BLS.

The main Aim of the course is to impart knowledge and skills among the participants to provide immediate medical care in cardio respiratory arrest conditions until proper medical care at a hospital can be given.

### **Objectives:**

- 1) Identification of Cardio-respiratory arrest.
- 2) Understanding the concepts of Knowing life support skills
- 3) Hands on skills development of BLS on mannequin

**Eligibility:** UG students

**Duration of course:** 16hr

**Course content includes:**

- Early recognition of Cardio Respiratory Arrest
- Activation of Emergency Medical Services
- Early high-quality CPR
- Early defibrillation
- Early transfer.

**Steps of CPR:**

1. Safe place for resuscitation
2. Victim's response check
3. Call for help, inform emergency medical system and get emergency equipment
4. Check pulse and breath simultaneously
5. Early high- quality cardiopulmonary resuscitation:
6. Early defibrillation
7. Recovery position
8. Transfer

### Method of conduction of the course-

- Didactic lectures-2hours.
- Hands on workshop  
Demonstration and  
Assessment- 10 hours Online  
Module teaching and  
assessment-4hours

- **Scheme of examination:**

Multiple choice questions to evaluate the knowledge  
.Assessment of the skills of BLS

Add on Course in

**BASICS OF**

**ECG**

## ADD ON COURSE IN BASICS OF ECG

Prakash Institute of Medical Sciences & Research, Urun-Islampur

### Preamble:

Medical students learn fundamentals of ECG in their First year MBBS in the subject of physiology. The real application of ECG becomes evident in clinical years. Students face a lot of difficulties in interpretation of even normal ECG. In order to revisit the basics of ECG, Department of physiology, in collaboration with department of medicine, has designed an add on course on ECG which will certainly help considerably not only in revisiting basics but also relate the fundamentals to its application.

**Objectives :** At the end of the course the students will be able to

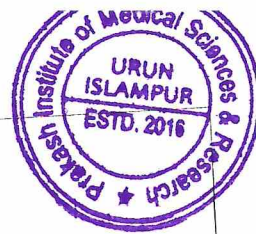

- 1) describe the principles of ECG
2. record ECG independently
3. interpret a normal 12 lead ECG
4. identify common ECG abnormalities

**Course duration:** 16 hours

**Eligibility:** UG students

**Course syllabus:**

Module	Topic	Duration
I	Introduction to ECG	1 Hours
II	Recording of 12 lead ECG	3 hours
III	Interpretation of normal ECG & calculation of Heart rate	3 hours
IV	ECG interpretation in common cardiac conditions: MI, cardiac arrhythmias etc	3 hours
V	Electrolyte Imbalance – Hypo/Hypercalcaemia, Hypo – Hyperkalaemia etc & its interpretation in ECG	3 hours

VI	ECG in Heart Blocks	2 hours
Assessment	MCQ/Viva	1 hour

### **Pedagogy**

(i) Lectures

(ii) Practical sessions/demonstrations.

Theory lectures & practical demonstration on ECG will be jointly conducted by Department of Physiology & medicine. Both pretest and post test questionnaire will be given to students to find out how effective the course has been and to bring about desirable modifications if needed.

The students' feedback will be taken to find the effectiveness of the programme. The students will be awarded with the course completion certificates after their satisfactory outcome in assessment.

### **Assessment**

Assessment will be in the form of MCQs.

### **References:**

1. Hampton R John. The ECG Made Easy : The classic introductory text to ECG interpretation.
2. Hampton R John . The ECG In Practice : A great basic ECG text covering all the essentials.
3. Hampton R John . 150 ECG Problems: Test your knowledge with 150 assorted ECGs of varying difficulty.
4. Understanding of ECG – Dr. P.J. Mehta
5. Guyton text book of Physiology
6. ECG for beginners by Subramanian Anandraja.

& RESEARCH**

## **CERTIFICATE OF COMPLETION**

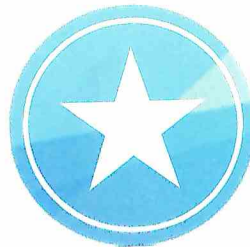

This is to certify that

**PATEL TVISHA MEHUL**

Has successfully completed Certificate course in  
**BASIC LIFE SUPPORT (BLS) SKILLS** held in

2023-24

Coordinator,  
Prakash Institute of  
Medical Sciences

Dean,  
Prakash Institute of  
Medical Sciences

**Prakash Institute of  
Medical Sciences  
& RESEARCH**

## **CERTIFICATE OF COMPLETION**

This is to certify that

**DUDHARE ADITI ARJUN**

Has successfully completed Certificate course in  
**YOGA & MEDITATION** held in 2022-2023.

Coordinator,  
Prakash Institute of  
Medical Sciences

Dean,  
Prakash Institute of  
Medical Sciences

**Prakash Institute of  
Medical Sciences  
& RESEARCH**

## **CERTIFICATE OF COMPLETION**

This is to certify that

**DIWANJI OMKAR MILAN**

Has successfully completed Certificate course in  
**YOGA & MEDITATION** held in 2022-2023.

Coordinator,  
Prakash Institute of  
Medical Sciences

Dean,  
Prakash Institute of  
Medical Sciences

**Prakash Institute of  
Medical Sciences  
& RESEARCH**

## **CERTIFICATE OF COMPLETION**

This is to certify that

**GAVALI ADITI  
MANOJKUMAR**

Has successfully completed Certificate course in  
**NOSOCOMIAL INFECTIONS** held in 2022-2023

Coordinator,  
Prakash Institute of  
Medical Sciences

Dean,  
Prakash Institute of  
Medical Sciences

**Prakash Institute of  
Medical Sciences  
& RESEARCH**

## **CERTIFICATE OF COMPLETION**

This is to certify that

**GALANDE RUTIKA  
BHIMASHANKAR**

Has successfully completed Certificate course in  
**NOSOCOMIAL INFECTIONS** held in 2022-2023

Coordinator,

Prakash Institute of  
Medical Sciences

Dean,

Prakash Institute of  
Medical Sciences

**Prakash Institute of  
Medical Sciences  
& RESEARCH**

## **CERTIFICATE OF COMPLETION**

This is to certify that

**KALE ASHUTOSH  
BALASAHEB**

Has successfully completed Certificate course in  
**DISASTER IMPACT** held in 2022-2023.

Coordinator,  
Prakash Institute of  
Medical Sciences

Dean,  
Prakash Institute of  
Medical Sciences

**Prakash Institute of  
Medical Sciences  
& RESEARCH**

## **CERTIFICATE OF COMPLETION**

This is to certify that

**KAMAT ATHARV NITIN**

Has successfully completed Certificate course in  
**DISASTER IMPACT** held in 2022-2023.

Coordinator,  
Prakash Institute of  
Medical Sciences

Dean,  
Prakash Institute of  
Medical Sciences

**Prakash Institute of  
Medical Sciences  
& RESEARCH**

## **CERTIFICATE OF COMPLETION**

This is to certify that

**SATPUTE SHUBHAM  
VITTHAL**

Has successfully completed Certificate course in  
**RESEARCH TOOLS** held in 2022-2023.

Coordinator,  
Prakash Institute of  
Medical Sciences

Dean,  
Prakash Institute of  
Medical Sciences

**Prakash Institute of  
Medical Sciences  
& RESEARCH**

## **CERTIFICATE OF COMPLETION**

This is to certify that

**SHAIKH NUSRAT  
AAFREEN NAEEM**

Has successfully completed Certificate course in  
**RESEARCH TOOLS** held in 2022-2023.

Coordinator,  
Prakash Institute of  
Medical Sciences

Dean,  
Prakash Institute of  
Medical Sciences

**Prakash Institute of  
Medical Sciences  
& RESEARCH**

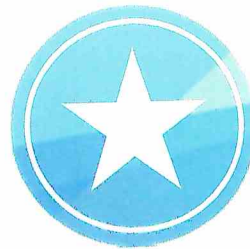

## **CERTIFICATE OF COMPLETION**

This is to certify that

**AGHAO SANCHIT RAJESH**

Has successfully completed Certificate course in  
**BASICS OF ECG** held in 2022-2023

Coordinator,  
Prakash Institute of  
Medical Sciences

Dean,  
Prakash Institute of  
Medical Sciences

**Prakash Institute of  
Medical Sciences  
& RESEARCH**

## **CERTIFICATE OF COMPLETION**

This is to certify that

**SHAIKH ABDUL HAFIZ  
MUSHTAQUE**

Has successfully completed Certificate course in

**KNOWING LIFE SUPPORT SKILLS** held in

2022-2023

Coordinator,  
Prakash Institute of  
Medical Sciences

Dean,  
Prakash Institute of  
Medical Sciences

**Prakash Institute of  
Medical Sciences  
& RESEARCH**

## **CERTIFICATE OF COMPLETION**

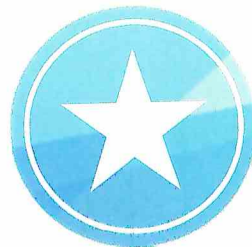

This is to certify that

**SHAIKH ARIBA SHAKEEL  
AHAMAD**

Has successfully completed Certificate course in  
**KNOWING LIFE SUPPORT SKILLS** held in

**2022-2023**

Coordinator,  
Prakash Institute of  
Medical Sciences

Dean,  
Prakash Institute of  
Medical Sciences

**Prakash Institute of  
Medical Sciences  
& RESEARCH**

## **CERTIFICATE OF COMPLETION**

This is to certify that

**AGAWANE PRADNYA  
PRAVIN**

Has successfully completed Certificate course in  
**BASICS OF ECG** held in 2022-2023

Coordinator,  
Prakash Institute of  
Medical Sciences

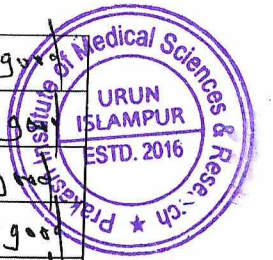

Dean,  
Prakash Institute of  
Medical Sciences
